Introducing game aspects like point scoring and competition into a work environment.

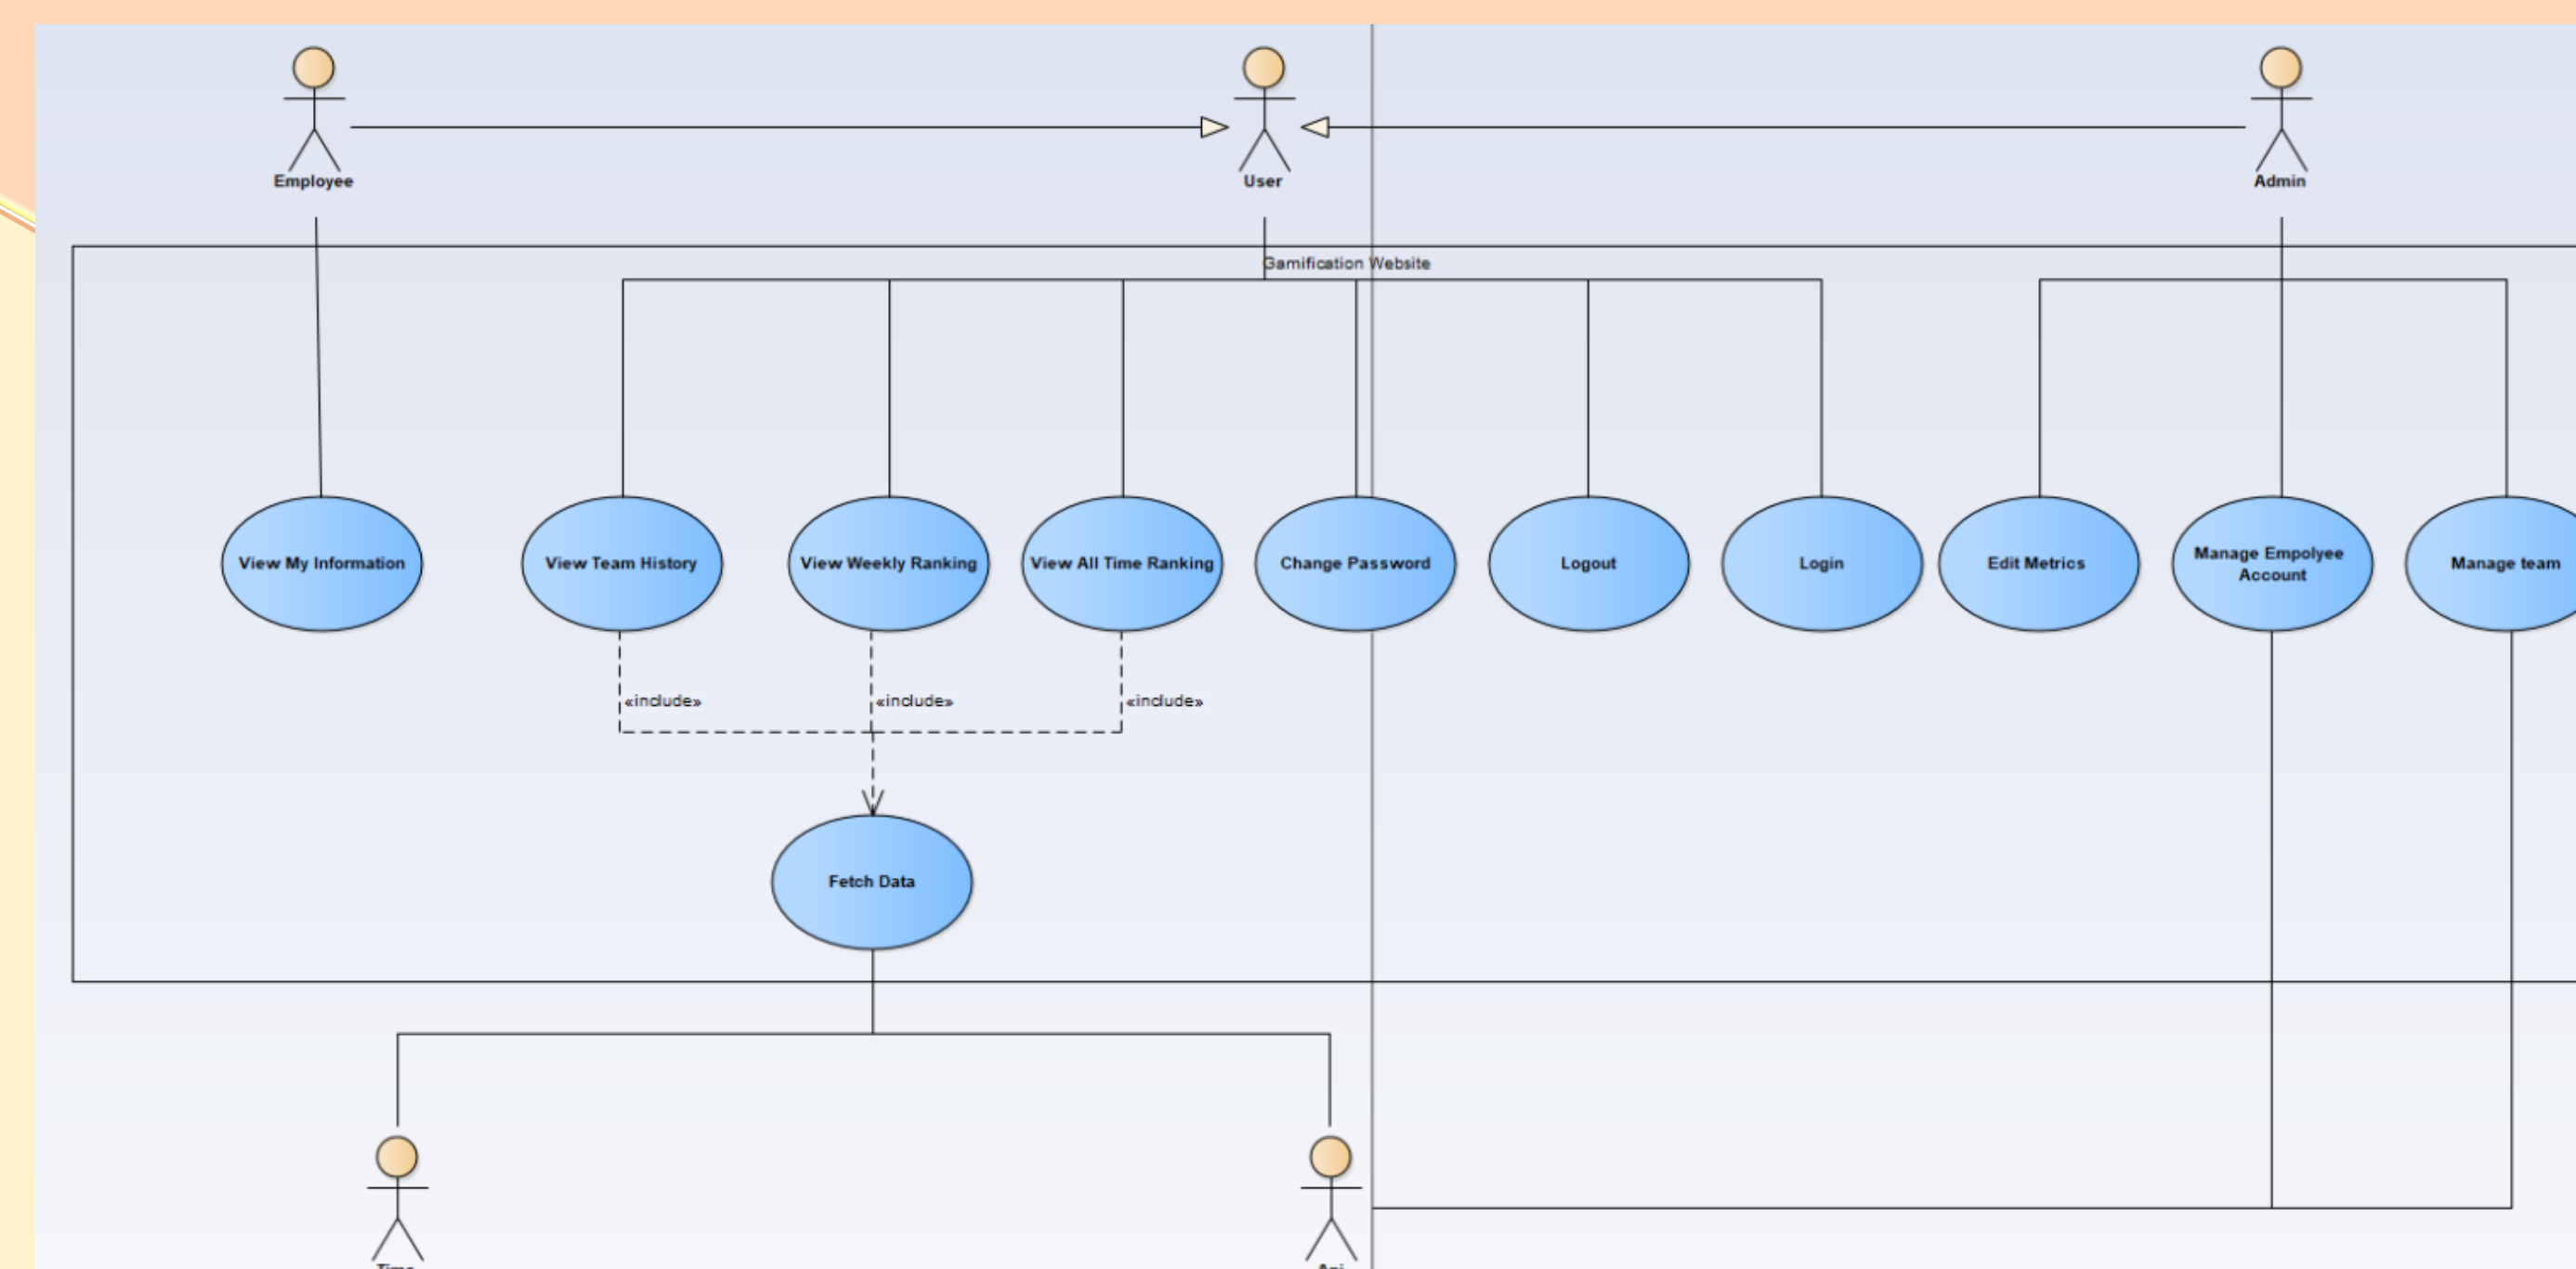

Creating a fun environment that motivates employees to work harder, better, and smarter.

- Designed for landscaping companies that deploy teams
- teams go on jobs and bring equipment along.
- The website ranks the teams based on how well they keep track of the equipment.
- ✓ The software allows companies to change the weight for the equipment depending on their priorities.
- ✓ The algorithm ranks teams based on their own best potential performance to allow fair competition.
- ✓ History is preserved allowing team improvement to be noticed and rewarded.
